Supervisor's Instructions

- Living Springs staff to give specific instructions on use of Flying Fox.
- Two adults to supervise activity, one at top platform, one at bottom station.
- Read signage at site of Flying Fox.

KEY TO OCCURRENCE PROBABILITY

This key is used in determining the probability of an accident/injury/illness occurring in any of the activities made available to paying groups or organisations who use these facilities.

- It is always possible but has not happened here.
- Has happened but not here.
- Has happened here; No/or minor injury; Is likely to happen again. (see note 1)
- Has happened here; No/or minor injury; Not likely to happen again. (See note 2)
- Has happened, is likely to happen again; No injury
- Has happened, serious/fatal injury.

NOTE 1: Due to the nature of some activities/events injuries will be unavoidable, e.g. contact sports. Every endeavour will be made as can be seen throughout the Risk Management Plan, to ensure that this is minimised.

NOTE 2: Accidents with injuries have occurred on these events but tighter controls and stricter monitoring, and in some instances the elimination of part of an event has ensured continual safety.
