

RISK MANAGEMENT . . .

Playground

Activity	Playground	Date	October 09
Location	Living Springs	Other	
Hazards	Significance (1=minor, 2=major, 3=life changing)	Eliminate/Isolate/Minimize	
Hard Ground	Yes 1	Minimize	

SITUATED: West side of main camp near pool

RISK DETAIL	LIKELY INJURY OR ILLNESS	OCCURRENCE PROBABILITY	RISK CONTROL
Falling over boundary edge	Bruises, cuts	1	<ul style="list-style-type: none"> No pushing and limited running. Clear instructions given.
Colliding at end of slide	As above	1	<ul style="list-style-type: none"> Children clear from bottom of slide. Clear instructions given.
Falling off	Bruises, cuts, fractures, concussion	1	<ul style="list-style-type: none"> No pushing. Take care if wet. Do not use after dark. Clear instructions given.

Supervisor's Instructions

- Supervised area – not necessarily staffed.
- Care to be taken on windy days due to the possibility of falling branches.

Operating Instructions:

- Only children 8 years and under are permitted to use the playground.

KEY TO OCCURRENCE PROBABILITY

This key is used in determining the probability of an accident/injury/illness occurring in any of the activities made available to paying groups or organisations who use these facilities.

- It is always possible but has not happened here.
- Has happened but not here.
- Has happened here; No/or minor injury; Is likely to happen again. (see note 1)
- Has happened here; No/or minor injury; Not likely to happen again. (See note 2)
- Has happened, is likely to happen again; No injury
- Has happened, serious/fatal injury.

NOTE 1: Due to the nature of some activities/events injuries will be unavoidable, e.g. contact sports. Every endeavour will be made as can be seen throughout the Risk Management Plan, to ensure that this is minimised.

NOTE 2: Accidents with injuries have occurred on these events but tighter controls and stricter monitoring, and in some instances the elimination of part of an event has ensured continual safety.
