### Supervisor's Instructions

- Supervised area – not necessarily staffed.
- Minimum amount of one supervisor per 20 children, but one female and male preferred.
- Supervisors are not to swim but must be continuously watching the activities in and around the pool.
- Supervisor must carry a whistle and pool to be locked after use.
- The CPR instructions on the wall must be read.

### Operating Instructions:

- Rules must be read and enforced.
- Children under 14 years must be ACTIVELY SUPERVISED by a caregiver 16 years or over. (Actively supervised means watching your child at all times and able to provide immediate assistance).
- Supervisor must have a cellphone available in case of emergency.
- A First Aid Kit is located in the cubicle on the right as you enter the pool building. The pool door key opens the box.

### KEY TO OCCURRENCE PROBABILITY

This key is used in determining the probability of an accident/injury/illness occurring in any of the activities made available to paying groups or organisations who use these facilities.

- It is always possible but has not happened here.
- Has happened but not here.
- Has happened here; No/or minor injury; Is likely to happen again. (see note 1)
- Has happened here; No/or minor injury; Not likely to happen again. (See note 2)
- Has happened, is likely to happen again; No injury
- Has happened, serious/fatal injury.

NOTE 1: Due to the nature of some activities/events injuries will be unavoidable, e.g. contact sports. Every endeavour will be made as can be seen throughout the Risk Management Plan, to ensure that this is minimised.

NOTE 2: Accidents with injuries have occurred on these events but tighter controls and stricter monitoring, and in some instances the elimination of part of an event has ensured continual safety.
