

RISK MANAGEMENT . . .

Tennis

Activity	Tennis Courts	Date	October 09
Location	Living Springs	Other	
Hazards	Significance (1=minor, 2=major, 3=life changing)	Eliminate/Isolate/Minimize	
Posts	Yes 1	Minimize	
Net	Yes 1	Minimize	

SITUATED: North side of main camp (down hill)

RISK DETAIL	LIKELY INJURY OR ILLNESS	OCCURRENCE PROBABILITY	RISK CONTROL
Falling over	Sprain, bruises	3	<ul style="list-style-type: none"> Caution when playing on a wet court. Proper footwear to be worn.
Burnt feet	Burns, blisters	3	<ul style="list-style-type: none"> Temperature of court to be checked. Proper footwear to be worn.
Sunburn	Burns, blisters	3	<ul style="list-style-type: none"> Proper protection, e.g. hat and/or sunscreen

Supervisor's Instructions

- This activity does not need supervision unless small children are using the court; then they must be supervised by an adult.
- Equipment to be checked after use.
- Equipment to be returned to allotted location.

Operating Instructions

- White soled (non-marking) shoes to be worn.
- If children are not wearing shoes they must check out the temperature of the court on a hot day.

KEY TO OCCURRENCE PROBABILITY

This key is used in determining the probability of an accident/injury/illness occurring in any of the activities made available to paying groups or organisations who use these facilities.

- It is always possible but has not happened here.
- Has happened but not here.
- Has happened here; No/or minor injury; Is likely to happen again. (see note 1)
- Has happened here; No/or minor injury; Not likely to happen again. (See note 2)
- Has happened, is likely to happen again; No injury
- Has happened, serious/fatal injury.

NOTE 1: Due to the nature of some activities/events injuries will be unavoidable, e.g. contact sports. Every endeavour will be made as can be seen throughout the Risk Management Plan, to ensure that this is minimised.

NOTE 2: Accidents with injuries have occurred on these events but tighter controls and stricter monitoring, and in some instances the elimination of part of an event has ensured continual safety.
