

RISK MANAGEMENT . . .

Trampolines

Activity	Trampolines	Date	October 09
Location	Living Springs	Other	
Hazards	Significance (1=minor, 2=major, 3=life changing)	Eliminate/Isolate/Minimize	
Rusty Springs	Yes 1	Eliminate	
Hole in mat	Yes 2	Eliminate	
Dug out filling in	Yes 1	Eliminate	
Missing springs	Yes 2	Eliminate	
Exposed Metal	Yes 2	Eliminate	

SITUATED: East side of main camp at top of hill

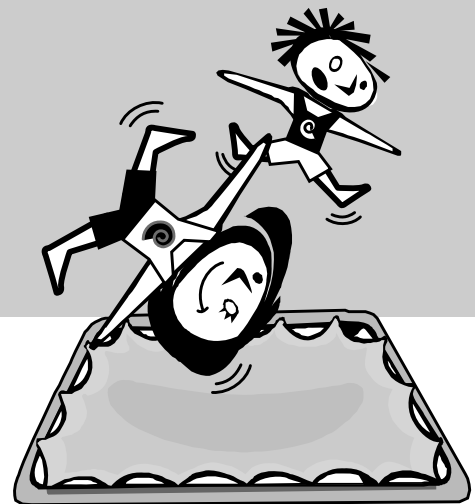

RISK DETAIL	LIKELY INJURY OR ILLNESS	OCCURRENCE PROBABILITY	RISK CONTROL
Children landing on each other	Bruises, cuts, concussion	3	<ul style="list-style-type: none"> Only two people allowed on the trampoline at one time.
Falling on the bar at the side	Bruises	1	<ul style="list-style-type: none"> No pushing. Clear instructions given.

Supervisor's Instructions

- This activity needs no supervision unless there are pre-school aged children using them. Then they must be supervised by an adult.

Operating Instructions:

- No shoes to be worn on the trampolines.
- Trampolines are out of bounds to children after dark.

KEY TO OCCURRENCE PROBABILITY

This key is used in determining the probability of an accident/injury/illness occurring in any of the activities made available to paying groups or organisations who use these facilities.

- It is always possible but has not happened here.
- Has happened but not here.
- Has happened here; No/or minor injury; Is likely to happen again. (see note 1)
- Has happened here; No/or minor injury; Not likely to happen again. (See note 2)
- Has happened, is likely to happen again; No injury
- Has happened, serious/fatal injury.

NOTE 1: Due to the nature of some activities/events injuries will be unavoidable, e.g. contact sports. Every endeavour will be made as can be seen throughout the Risk Management Plan, to ensure that this is minimised.

NOTE 2: Accidents with injuries have occurred on these events but tighter controls and stricter monitoring, and in some instances the elimination of part of an event has ensured continual safety.
